GEOHAZARD

Solving Tough Engineering Problems

AP DYNAMICS provides a complete range of **Geohazard Services** to identify potential risks to **pipeline integrity**. Our experienced engineers are highly qualified for identifying and conducting geohazard analyses to ensure that a high-quality product can be safely constructed with reasonable costs.

TYPES OF ANALYSIS

- ✓ Slope Stability
- ✓ Fault Crossings
- ✓ Soil Liquefaction
- ✓ Surface Heave
- ✓ Settlement

TYPICAL APPLICATIONS

- ✓ Pipelines
- ✓ Facilities
- ✓ Crossings
- ✓ Horizontal Directional Drilling
